# CATALOGUE 2020/2021

## It's all about balance

DITA® was founded in 1891, just after the game of hockey was born. Ever since then, we have focussed on delivering hockey gear that sets itself apart when it comes to quality and **intuitive play**.

Unique to all DITA® sticks is the **DITA® GrooveZone**, which allows for a much better **balance of power, handling and playability**. The GrooveZone was developed around the time DITA® introduced the very first carbon-glass reinforced hockey stick and it has been a key reason for top level, intuitive players to prefer DITA®.

Today, DITA® still focuses on achieving just the right balance between all that carbon brings to sticks. Our **brand new collection** forms the ultimate proof that even DITA® sticks and their GrooveZone can be improved to offer **even more player feedback, better handling and fatigue reduction**. Just try them out and you'll feel what we mean.

When it comes to DITA® footwear, the new collection will help you achieve even **better balance and stability** on the field while keeping your shoes lightweight, comfortable and easy to maneuver.

DITA®

**One Step Ahead.**

# Sticks

# DITA® Hockey stick collection 2020

## OUR VISION:

Built to deliver a sublime playing experience. The CarboTec and CompoTec ranges are engineered to deliver control, balance and above to act as an extension of the player. Playing with the DITA® stick is a seamless experience, where a player is assured of the integrity of the stick, and what it was built to do whether that be to strike with maximum power, lift the ball for aerials or dribble with 100% control and power past defense.

We have strived to build sticks this season that work in harmony with the player in every sense always keeping them One Step Ahead.

## MORE THAN CARBON:

DITA® has always been one step ahead. We were there at the very beginning of hockey with the inception of the DITA® brand in 1891.

We produced the first carbon-glass reinforced hockey stick, the Carbotec, in the 1980's, which changed the game and how everyone plays it.

While other brands focus exclusively on carbon, DITA® focuses on achieving a balance what carbon brings to sticks: stiffness and power, to what a player needs to perform: comfort, balance and control in play.

This balance of power and playability is achieved by the DITA® GrooveZone.

## ADVANTAGES OF THE GROOVE ZONE FOR PLAYERS:

### 1. UNEQUALLED POWER TRANSFER

Carbon brings power and with the DITA® GrooveZone, that power is harnessed so that a player can play with poise, balance and accuracy. Movement is transferred flawlessly from arm to stick with minimum returning vibration.

### 2. PLAYER COMFORT AND FATIGUE REDUCTION

DITA® sticks place the balance point close to the player and in doing so this reduces the forces at work on the player's arm. This unique placement and the GrooveZone reduce player fatigue and increase control.

### 3. PHYSICAL FEEDBACK FOR BETTER HANDLING AND INTUITIVE PLAY

The GrooveZone has a textured surface to give players constant physical feedback from the stick and to encourage them into the proper posture and hand placement for better play. DITA® players don't need to see the stick to play, they feel it to stay one step ahead.

**The DITA® GrooveZone is integrated in all our 2020 sticks**

## About Dita bows:

Across the DITA® range you can find sticks with varying curve or bow heights and placements, ranging from standard to extremely low bows.

The more pronounced the bow is and the lower it is placed the more technical and skilled handling of the stick is required. The gradual growth in hockey skill will lead to the eventual ability to get the best out of more pronounced and low bow sticks. Personal preference and feel can of course dictate how big a bow is desired in order to excel as an athlete. Note that our most pronounced bows are engineered with the virtuoso player in mind.

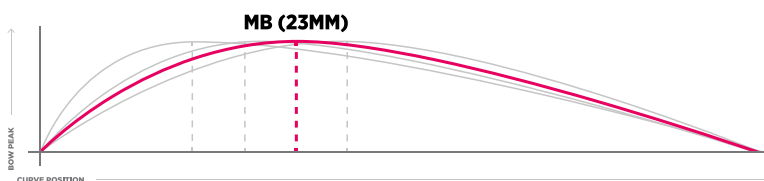

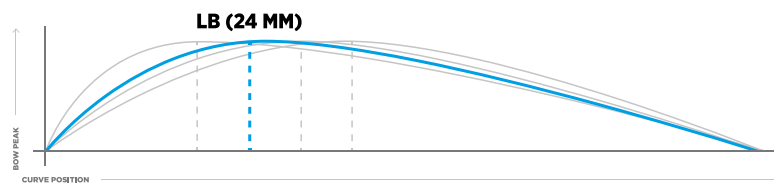

### X-Bow (X-Treme, XB)

Our most pronounced curve with a peak height of 25mm and placed very low on stick. This design allows the best players to come into their own, expressing their full creativity and skill in every way. A stick to be earned.

### L-Bow (Late-Bow, LB)

The late bow has a peak bend of 24mm and is designed for the advanced player who is more aggressive in their play. This bow supports more dynamic, multi-dimensional play such as drag flicks and aerals. Comes with a J-shaped head.

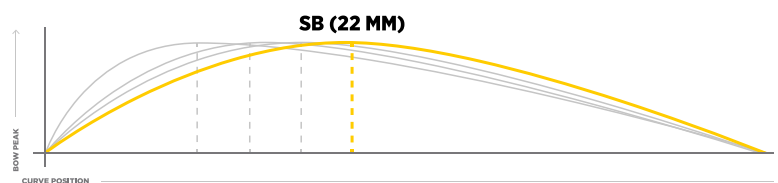

### Mid Bow (Mid-Bow, MB)

A 23mm Mid Bow is suitable for a more experience hockey player still polishing skills but with basic under their belt. Dribbling is kept easy with the J-shaped head.

### Standard Bow (S-Bow, SB)

The 22mm Standard Bow is for the creative playmaker still developing their skills. This bow will minimise accidental lifts and support skill development. Features a J-shaped head for optimum ball control.

# CarboTec Pro C100 X-BOW

## CarboTec Pro Range

The CarboTec Pro is our premium range of hockey sticks. Featuring Toray T800 12k carbon fiber with a staggering 5490Ma of tensile strength. That's stronger than concrete, steel and marble. We used Toray 3K 4x4 V-Twill carbon fabrics executed at 60 degree angles on this range. This results in not only a beautiful pattern but also improves the damage tolerance and shock absorption of the stick.

A range developed for the very best hockey players, used by our professional athletes.

# CarboTec C90 X-BOW

## CarboTec Range

The Carbotec hockeystick range uses Toray T700 12k carbon fiber. The material is applied with improved elongation to protect the stick from micro-rupture and splitting while still delivering a powerful playing experience.

We used Toray 3K 4x4 V-Twill carbon fabrics executed at 60 degree angles resulting in not only a beautiful pattern but also improves the damage tolerance and shock absorption of the stick.

The high end DITA® stick for advanced players who have polished their skills and play with the best.

# COMPOTEC C70 X-BOW

## CompoTec Range

We have created our Compo Tec range with the best possible quality carbon from TAIRYFIL 12KTC42S. The sticks boast incredible tensile strength, excellent weight to strength ratio and an impressive 5.1µ filament diameter. This all makes the CompoTec series an affordable carbon performance hockey stick range.

A collection of sticks designed for experienced but still developing players who want the power of carbon at an affordable price.

# FIBERTEC C45 L-BOW

## FiberTec Range:

Hockey is a game for all ages, and to DITA® it's imperative that rookies are also equipped with excellent sticks. The FiberTec range combines a powerful stick with a soft touch. Hi-performance fibers are combined with a special resin formula to create a strong stick but also one that will absorb more impact forces making play more comfortable.

# CARBOTEC C100 3D X-BOW

## 3D Range

We continue to innovate at DITA® as hockey also evolves. We designed the DITA® 3D sticks to help players to bring the ball off the ground and play the air with ease. The stick features the Katana-shaped head, which has a sharper edge and more slender design than the standard sticks. Designed especially for those who love to play the air and frequently use aerial shots in their game.

# Junior

# CARBOLIGHT C70 X-BOW YOUNG STAR

## Junior Range:

Extremely talented youngsters need to get used to the maximum power and feel of top line sticks at a young age. As these young players still lack the body strength of an adult player they can best develop their skills using hockey sticks made with the same materials, but with adjusted weight and profile.

# Shoes

## LGHT 750 High Knitted Footglove

The LGHT 750 High Footglove is an extremely lightweight hockey shoe with a low profile and loads of grip. It combines ultra-modern technology with great looks. The stretchy woven upper gives a 'sock-like' fit and the single density midsole combines with a shock absorbing pad (SAP) and toe guard gives an unrivalled combination of comfort, protection and agility.

Our combination sole unit is designed for both sand and water-based pitches and gives great multi directional grip and braking. Comes with an extra innersole for higher foot arches and heel lift enabling you to achieve the perfect fit.

The LGHT 750 High Woven Footglove, a trendsetting new generation hockey shoe, providing the ultimate performance.

**size** 8019.018  
UK 4 - 12 + 13

**colour**  C. NO. 42 Fluo Red  
 C. NO. 90 Black

**Remarks** Outsole: Astro & Turf profile  
Midsole: Phylon (=EVA moulded)  
Upper: EVA Moulded Dual Density

## STBL 750 High Footglove

The STBL 750 High Footglove is a lightweight hockey shoe with a stable low profile and loads of grip. The stretchy woven upper gives a 'sock-like' fit and the single density midsole combines with a shock absorbing pad (SAP) and toe guard gives an unrivalled combination of comfort, protection and agility.

Our combination sole unit is designed for both sand and water-based pitches and gives great multi directional grip and braking. Comes with an extra innersole for higher foot arches and heel lift enabling you to achieve the perfect fit.

The STBL 750 High Woven Footglove, a trendsetting new generation hockey shoe, providing the ultimate performance.

**size** 8019.018  
UK 4 - 12 + 13

**colour**  C. NO. 42 Fluo Red  
 C. NO. 90 Black

**Remarks** Outsole: Astro & Turf profile  
Midsole: Phylon (=EVA moulded)  
Upper: PU with mesh

## STBL 550

The STBL 550 is an ultra-lightweight shoe with a stable low profile. The bootee style inner combined with a multi-layer lacing pattern gives a snug supportive fit. The dual-density phylon midsole combined with a stiffer mid-foot shank gives a great combination of comfort, protection and stability.

The classic DITA® outsole gives outstanding grip on all types of turf.

Comes with an extra innersole for higher foot arches and heel lift enabling you to achieve the perfect fit.

**size** 8020.021  
UK 4 - 12 + 13

## LGHT 550

The LGHT 550 is an ultra-lightweight hockey shoe. The low profile single density midsole incorporating a shock absorbing heel pad makes the LGHT 550 one of the most comfortable and lightest hockey shoes on the market. This year the upper has more nylon mesh making it lighter and more breathable.

Our combination sole unit is designed for both sand and water-based pitches and gives great multi directional grip and braking. SAP (Shock Absorbing Pad) creates extra cushioning on the heel and provides the perfect transition from landing to take off.

Comes with an extra innersole for higher foot arches and heel lift enabling you to achieve the perfect fit.

**size** 8020.017  
UK 3,5 - 12
